

Office Guidelines for Covid-19

1. All patients need to wear a mask in the waiting room. If they don't have a mask they can stay in their car and wait for us to call them when we are ready for their appointment. After dental procedure is complete their masks must go back on, as they proceed to the reception desk.
2. Patients are not allowed to brush their teeth in the bathroom.
3. All patients 12 and older will pre-rinse with Colgate Peroxyl Mouthwash (2 teaspoons for 60 sec.) before all dental procedures.
(ADA and CDC are only recommending peroxide to destroy the virus at this time, Peroxyl is 1.5% peroxide.)
4. Patients should limit bringing others with them to their appointments
5. Patients will need to fill out a patient screening form before their appointment
6. Patients will have their temperature taken before entering the room and documented in chart
(CDC recommendation normal temp is 100.4 or below)
7. There will be hand sanitizer in every room, please use it often.
